**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 46-49, drawn to a water distribution system.

Group 2, claim(s) 50-52 and 58-59, drawn to a second water distribution system / shower arrangement.

Group 3, claim(s) 53-57, drawn to a third water distribution system.

2. The inventions listed as Groups 1, 2, and 3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature between these groups 1 and 2, 2 and 3, and 1 and 3, are decontaminating members restrainably located in a circulating member. This arrangement is shown, for example, in U.S. Patent No. 5,531,908 to Matsumoto et al. **(See Fig. 1).**

3.

4. Claims 40-45, appear to be currently generic to each of the above listed inventions and will be examined along with the elected invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
